

Defining Housewares

### Getting Started – Control Buttons:

### Before First Use:

We strongly recommend to fill the kettle with regular tap water at MAX Level (1.7L), bring it to a full boil by pressing the On/Off button . The red indicator light of the kettle will be powered together with a "beep" sound. The kettle will automatically shut off with a "beep" sound after boiling.

#### Remember:

- Always make sure that the kettle is positioned properly on its power base.
- Keep the outisde surface of the kettle dry before turning it on.
- The kettle will automatically shut off once it reached the designated temperature.
  Temperature can be changed by pressing the button accompanied by a "beep" sound and indicator light.
- Temperature varies ± 10°F (5°C) however still within range for optimal brewing for tea and coffee.

# **KS88 Series FAQS**

## Know Your Ovente Kettle:

What is Keep Warm Function?

- Keep Warm Function can be used before, during or completion of the water heating cycle.
- It functions when temperature drops to 185°F and will reboil the water back to 212°F.
- The kettle will continuously stay on keep warm function for a period of 2 hours or as long as the kettle is not lifted off from the base. Once lifted from the base, the kettle will turn off. Repeat if desired.

### To Use Keep Warm Function:

Press the On/Off button for 3 seconds. You will hear a "beep" sound and the red indicator light will keep on flashing on the window display.

Press and hold the On/Off button for 3 seconds

Variable Temperature Control:

The temperature indicator panel has 5 different preset Fahrenheit temperatures for optimal tea and coffee brewing.

## Troubleshooting:

Problem	Solution
Indicator light is not turning on but I heard a "beep" sound from the kettle	Ensure that the kettle is plugged in and positioned properly on the power base. Press the <sup>(1)</sup> once to boil water or <sup>(2)</sup> for desired temperature
Kettle is not heating water	Ensure that the kettle is plugged in and positioned properly on the power base. Press the <sup>(1)</sup> once to boil water or <sup>(2)</sup> for desired temperature. Check if the indicator light is powered ON. If kettle is still not heating water, please call Ovente's Customer Service (855-926-2626)
Lid is only opening half way	This is normal for safety precautions. Open the lid fully and fill or pour water.
There are brown/red/white spots at the bottom of my kettle	Ths is normal especially on areas with hard water. Please refer to the instruction manual for descaling instructions.
