

If your remote control does not work, please check the following 2 aspects first:

1. Please make sure that you have removed the transparent film of the battery and installed the positive and negative terminals of the battery correctly.
2. Have you also pressed the "touch panel" on the lamp pole? Is the touch panel working properly?

How do I get the remote to match the floor lamp?

- Step 1. After unplugging the floor lamp power, press the power button on the remote control and do not release it (the red indicator light on the remote control will light up);
- Step 2. At the same time, plug in the lamp's power plug;
- Step 3. You will see the lamp blinking, indicating that the remote control and the lamp have been successfully matched.

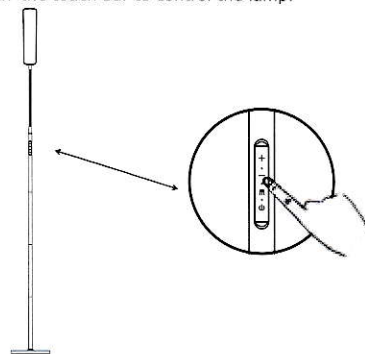

If still unsuccessful, please press and hold the remote control switch for a long time and do not release it, at the same time, after 2-3 seconds, repeat the unplugging and plugging in the lamp power plug to check if the matching is successful.

Usage

There are two ways to control: Touch control or Remote control.

Touch control

Please touch the touch bar to control the lamp.

• **Turn ON/Turn OFF:**

How to match the lamp and remote control?

Make sure the remote control is matching the lamp : power plug in the lamp , use the remote to control the lamp. Normally the remote controls the lamp perfectly ;

If remote control doesn't work for the lamp , please re-match the Remote and Lamp.

Matching procedure :

1.Unplug the product,The remote control should be equipped with batteries successfully, when the indicator will be on.At this time,keep pressing the power button of the remote control without releasing it.

2.Plug the product, The light will automatically light up. (keep pressing that power button without releasing it)

3. If the light flickers, it indicates that the pairing is successful. The remote control can now be used.
